Profile

Software engineer adept in developing React JS, Node JS based web applications in an Agile environment with the ability to effectively self-manage during independent projects, as well as collaborate in a team setting.

—

Skills

React JS, Node JS, JavaScript, TypeScript, Git, MongoDB

—

Work Experience

Software Engineer
October 2020 – Present

Client: PayPal   Oct 2020 – Sept 2023
Skills used: React JS, Node JS, Kraken JS, JavaScript, TypeScript, Git

- **Reduced the payload size** of Node JS based mid-tier application's API by **~97%** which resulted in faster page load time of the front-end page and **decrease in 95th percentile CPL by ~27%.**
- Improved the performance of Kraken based application by **reducing ~20% of the bundle size**.
- Built dynamic data and document collection experiences for the users e.g.: CIP, ReKYC, Name Change etc., which ensures users resolve their account limitations and have smoother payments experience.
- Created reusable new UI component.
- Collaborated with different stakeholders throughout the SDLC to ensure the successful and timely completion of the project.

Client: eBay   Oct 2023 – Present
Skills used: React JS, Marko JS, Kraken JS, Node JS, JavaScript, HTML, CSS, Git

- Developing and improving the Help hub/Self-service application which enables the users to facilitating instant assistance and effortless reporting of any violations.
- Responsible for developing & managing the Dashboard which enabled the seller to view all the violations reported against them and take necessary actions.

—

Achievements

- **Cheers Award – Most Determined Employee**
- **Cheers Award - Doing the right thing, the right way**:
  For contributing in the Development, E2E testing and Release of a key initiative HK CIP by following the client's standards without slipping the timeline.
- **Cheers Award - Doing the right thing, the right way**:
  For contributing in improving the performance of the client's Kraken JS based Application resulting in faster page load time for the users.

Certifications

- AWS Certified Cloud Practitioner

Personal Projects

- TweetIT
    - **Technologies Used**: React JS, Node JS, MongoDB, ELK stack (ElasticSearch, Logstash, Kibana), Prometheus, Grafana.
    - TweetIT application functionality is similar to Twitter. It is a MERN stack based application, uses the ELK stack for centralised logging and Prometheus, Grafana for monitoring different metrics.
    - **Github Link** - github.com/GowriPriya10/TweetIT
- Multiple Face Recognition Application
    - **Technologies Used**: React JS, Node JS, MongoDB, Clarifai API.
    - MERN stack based Web application which detects multiple faces in the image using the Clarifai api.
    - **Github Link** -
      github.com/GowriPriya10/MultipleFaceRecognitionApp

Education

MVSR Engineering College/ Bachelor of Engineering
2016 - 2020, Hyderabad

CGPA: 8.62

Sr. Chaitanya Jr. College/ MPC
2014 - 2016, Hyderabad

Percentage: 96.1
